SUPER CONCENTRATES WITH INTEGRATED DOSING SYSTEM

E-FILL SUPER CONCENTRATES

E-fill 1 Litre Super Concentrates

Specially designed to meet the most common cleaning applications, the E-fill range of super concentrates is a revolutionary addition to Enov's product line-up.

Every 1 litre E-fill bottle provides significant savings of up to 70% compared to standard 5 litre products.

Each E-fill bottle has an integrated squeeze-and-fill dosing chamber to make sure you get a 10ml shot of concentrate every time. Accurate dosing ensures excellent cost-in-use savings over standard 5 litre concentrates and eliminates waste.

E-fill products don't just save you money* – they save on weight, storage space and packaging.

All of these benefits help make the E-fill range our most environmentally friendly. They are easier to transport (which reduces CO₂ and other emissions) and there's less waste throughout the whole product lifecycle.

*E-fill products may cost a little more up-front compared to standard 5 litre packs but as they're super concentrated every penny goes much, much further

The E-fill Advantage

- Cost effective
- Compact size
- Easy to handle
- Easy to store
- Less waste

Colour coded trigger bottles and matching labels are available separately for most E-fill 1 Litre Super Concentrates

E-FILL SUPER CONCENTRATES

The E-fill Range

Specially devised to meet the most frequent cleaning applications

E-012 Washing Up Liquid

Unperfumed multipurpose dishwashing detergent with a long lasting streak-free formulation. Use for dishwashing, cleaning walls and general surfaces. Biodegradable and free from phosphate and formaldehyde.

BBR012-1 6 x 1 litre

E-400 Floor Maintainer

High quality spray cleaning concentrate which contains polymer and wax to add shine and durability to polished floors. Can also be damp mopped and then burnished with a soft/medium pad.

BDR400-1 6 x 1 litre

E-100 Washroom Cleaner

Pleasantly perfumed all-round washroom cleaner. Contains powerful bactericide - effectively kills bacteria on all hand touch surfaces - taps, toilet flush handles, door handles etc.

BCR100-1 6 x 1 litre

E-500 Bactericidal Kitchen Cleaner

Designed for use on all kitchen and canteen surfaces. Suitable for all catering related cleaning including bar tops, around buffet hatches and self-service points of sale.

BBR500-1 6 x 1 litre

E-200 Multipurpose Cleaner

Fast acting general purpose cleaner for all water washable surfaces. Contains a clean pine fragrance leaving the room with a fresh 'just cleaned' atmosphere. Effective as both a trigger spray cleaner and as a damp mopping detergent.

BAR200-1 6 x 1 litre

E-600 Glass & Mirror Cleaner

Advanced, ammonia free formula is pleasant to use and ensures a smear-free finish. This nonabrasive solution is safe to use on delicate surfaces.

BAR600-1 6 x 1 litre

E-300 Floor Cleaner

Removes everyday dirt and grease on all types of hard floors. Low foaming, easy to use and rinses off quickly. Use as a mopping solution, or through a trigger spray when extra control is required, or when cleaning walls etc. Ideal for use with scrubber dryers.

BDR300-1 6 x 1 litre

E-710 Lemon Disinfectant

Kills smells and malodours, leaving a fresh lemon atmosphere. Contains a broad spectrum quaternary biocide. For use as a general disinfectant for floors, walls and drains in hospitals, schools, nursing homes, offices and factories etc.

BCR710-1 6 x 1 litre

E-FILL SUPER CONCENTRATES

How to Use the E-fill Range

The E-fill 1 litre bottles are easy to use, and the following guidelines will help you get the best results. **Always stick to the recommended dose.** Over-dosing increases the cost of cleaning and can result in reduced performance and more work required (e.g. additional rinsing)

Trigger Spray

- 

1 Select the correct E-fill Super Concentrate for the cleaning task and use appropriate PPE, e.g. goggles and gloves. **Always wear gloves when handling chemicals**
- 

2 Read the back label to familiarise yourself with the handling requirements, hazard and usage instructions
- 

3 Remove the cap from the E-fill Super Concentrate bottle
- 

4 Gently squeeze the bottle, pushing liquid up the spout and into the dosing chamber
- 

5 Stop squeezing once reservoir is full – excess liquid will drain back into the spout
- 

6 Take a correctly labelled empty 750ml trigger bottle and remove the spray head (twist collar anticlockwise)
- 

7 Fill the trigger bottle with 750ml of clean water. **Always add chemical to water, never water to chemical**
- 

8 Carefully pour the contents of the dosing chamber into the trigger bottle. Remember to replace the cap on the E-fill bottle immediately afterwards
- 

9 Insert spray head back onto the trigger bottle (rotate collar clockwise until it is tight)
- 

10 Double check the trigger bottle to make sure it is correctly labelled

Bucket

- 1 – 5 Follow **Trigger Spray** steps 1 - 5
- 6 Fill bucket with fresh, clean water
- 7 Pour contents of dosing chamber into bucket. Make sure the bottle is close to the water's surface and tip gently to avoid chemical splashes
- 8 Large buckets may require a second dose. Once dosing is completed, replace cap on E-fill bottle and return to storage

Sink & Scrubber Dryer

Follow the bucket dosing procedure. You will have to adapt the dose quantity in accordance to the capacity of the machine or sink being used. Typically 2 - 4 doses will be sufficient.

Remember - always stick to the recommended dose.

Some E-fill products are not suitable for particular applications, e.g. E-012 Washing Up Liquid is unsuitable for use in a trigger spray. Please refer to specific product information for details
